APPLICATION FOR PERMIT UNDER POLLUTION CONTROL ACT, 1967 (Effluent)

Preamble—This discharge from a secondary treatment plant has been in existence at this location for the past 18 years. This application reflects a tenfold reduction in volume and an improvement in effluent quality from the original pollution control permit. The point of discharge has been relocated to a point below the lowest road crossing. The terrain below the point of discharge is extremely steep and unattractive to hikers.

Anyone wishing any additional information on this discharge or a tour of this plant may contact the following Parks Branch personnel: G. F. Buydens in Victoria (387-5245) or Tom Hunter at Mount Seymour Park (Vancouver 929-3911).

THIS APPLICATION is to be filed with the Director, Pollution Control Branch, Parliament Buildings, Victoria, B.C. Any person who qualifies as an objector under section 13 (2) of the *Pollution Control Act, 1967* may, within 30 days of the date of application, or within 30 days of the date of publication in *The British Columbia Gazette* or in a newspaper, or, where service is required, within 30 days of the serving of a copy of the application, file with the Director an objection in writing to the granting of a permit, stating the manner in which he is affected. Those who do not so qualify may file with the Pollution Control Board an objection in writing under section 13 (6), in the same manner and time period as described above.

Her Majesty the Queen in right of the Province of British Columbia, as represented by the Minister of Recreation and Conservation, hereby applies to the Director for a permit to discharge effluent from a secondary sewage-treatment plant located at Mount Seymour Park into Francis Creek, which flows southward and discharges into Indian Arm, and gives notice of application to all persons affected.

The land upon which the works are located is Lot 1006 in Mount Seymour Provincial Park, in New Westminster Land District.

The discharge shall be located at Mile 6.24 on the Mount Seymour Park road. The quantity of effluent to be discharged is as follows: Average annual daily discharge (based on operating period), 6,000 imperial gallons (winter). Maximum daily discharge, 10,000 imperial gallons (winter).

The operating period during which the effluent will be discharged is November 15 to March 15, thereafter the flows are halved with little flow occurring in summer.

The characteristics of the effluent discharged shall be equivalent to or better than BOD₅, 20 mg/l; suspended solids, 30 mg/l.

The type of treatment to be applied to the effluent before discharge is secondary treatment (Spirogestor, trickling filter, and clarifier), followed by chlorination prior to discharge.

I, R. J. Hannon, Registrar, hereby certify that a copy of this application has been received by the Greater Vancouver Regional District.

This application, dated on the 28th day of November 1975, was posted on the ground in accordance with the Pollution Control Regulations.
